PROFESSIONAL SUMMARY

Motivated final-year Computer Science and Engineering student with a keen interest in emerging technologies and innovation. Committed to continuous learning and applying theoretical knowledge to real-world challenges. Demonstrates strong analytical thinking, problem-solving ability, and a collaborative mindset in both academic and project environments.

EDUCATION

B.E – Computer Science And Engineering , Kangeyam Institute of Technology 8.03 (Upto 5th semester)	2023 – Present CGPA:
HSC – Gandhi Matriculation Higher Secondary School , P.Velur	2022 – 80%
SSLC – Gandhi Matriculation Higher Secondary School , P.Velur	2020 – 76%

SKILLS

Programming: Python, C

Web Basics: HTML, CSS

Tools: GitHub, VS Code, Figma ,Google colab

Soft Skills: Problem Solving, Logical Thinking, Communication, Teamwork

PROJECTS

- **Smart Canteen Management System (Flask, SQLite)**
Developed a web-based Smart Canteen Management System to automate the food ordering process and minimize queue congestion. Implemented student registration and login, digital menu browsing, online order placement, automatic token generation, and real-time order status tracking. Designed an admin panel for managing menu items and processing customer orders, improving order accuracy and overall canteen efficiency.
- **Phishing Awareness Campaign (Gmail, Google Sheets, YAMM)**
Designed and executed a mock phishing simulation to enhance cybersecurity awareness. Used personalized emails and tracking tools to analyze user responses and improve security behavior.
- **UI/UX Design – QuickBite Food Delivery App (Figma)**
Designed low-fidelity wireframes for a food delivery application to define user flow and screen structure. Converted the wireframes into high-fidelity UI with color palette, typography, icons, and interactive components. Designed key screens including onboarding, home, restaurant list, menu, cart, and checkout while following UI/UX principles such as visual hierarchy, consistency, and accessibility.

INTERNSHIP EXPERIENCE

- **Data Science Intern – Emglitz Technologies, Salem (15 Days)**
Learned Python programming fundamentals and applied them in multiple mini projects. Explored data handling, basic visualization, and automation concepts, gaining practical exposure to problem-solving through hands-on coding exercises.
- **UI/UX Design Intern – CodeAlpha (January 2026 – January 2026)**
Designed low-fidelity wireframes for a food delivery mobile application using Figma. Converted wireframes into high-fidelity UI by applying color palettes, typography, icons, and visual components. Followed UI/UX principles such as visual hierarchy, consistency, and accessibility to improve user experience. Created key screens including onboarding, home, menu, cart, and checkout to ensure smooth navigation flow.

CERTIFICATIONS

- **NPTEL:** Joy of Computing using Python
- **NPTEL:** Data Science Using Python
- **NPTEL:** Introduction To Database Systems

AWARDS & CO-CURRICULAR

- **3rd Prize – AI-NEXUS 24 Hours Hackathon** (Kangayam Institute of Technology) – Developed an innovative software solution as part of a 24-hour team hackathon.
- **Paper Presentation – NEXT-GEN A Digital Transformation Journey** (Nandha College of Technology)
- **Participated in National Level Talent Fest REPOWIS'25** – Logic Battle, Brand Hunt, and General Quiz (Kongu Engineering College)
- **Workshop – Ethical Web Hacking** (PSG Institute Of Technology And Applied Research)

ROLES & RESPONSIBILITIES

- **Volunteer – Blood Donation Camp (2025)** : Assisted in participant registration and data entry.
- **Volunteer – Paper Presentation Event (Elantra 2K26)**: Assisted in event coordination, participant registration, and session management, ensuring smooth execution of the event.
